Ninety One UK Limited

Ninety One is an active global asset manager, dual-listed on the London and Johannesburg Stock Exchanges, with assets under management of £130.8 billion (as at 31 March 2025). With primary investment centres in London and Cape Town as well as investment teams in New York and Hong Kong, Ninety One offers a range of specialist and differentiated strategies across equities, fixed income, multi-asset, and alternatives. Ninety One aims to deliver consistent and sustainable long-term returns for its clients – institutions, advisors, and individuals around the world.

Fund Overview

The fund invests in global equities with a high quality bias. It typically invests in companies with high returns on capital, low leverage, enduring businesses with a sustainable competitive advantage that produce significant free cash flow after capital expenditure. The overarching investment approach employed is one of high conviction stock selection for constructing an actively managed portfolio of global equities with a high quality overlay, within a risk controlled framework.

Risk Factors

The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. The Fund may invest in derivatives to reduce risk or cost and/or generate extra income or growth. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. Part of the fund may invest in bonds. Investment in bonds and other debt instruments will be impacted by factors such as changes in interest rates and risk of default by the issuer. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and the income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Distribution Yield is the amount received by an investor, and is the sum of distributions paid over the past 12 months and divided by the last price. Since the yield is based on past information it is provided as a guide and should not be taken as a guaranteed yield. If fees are charged to the capital account then this could reduce the amount invested. Income may fluctuate in accordance with market conditions and taxation arrangements.
