

Sanlam Ninety-One Multi-Strategy Fund

Fund Fact Sheet

April 2026

Ninety One UK Limited

Ninety One is an active global asset manager, dual-listed on the London and Johannesburg Stock Exchanges, with assets under management of £130.8 billion (as at 31 March 2025). With primary investment centres in London and Cape Town as well as investment teams in New York and Hong Kong, Ninety One offers a range of specialist and differentiated strategies across equities, fixed income, multi-asset, and alternatives. Ninety One aims to deliver consistent and sustainable long-term returns for its clients – institutions, advisors, and individuals around the world.

Fund Overview

The fund invests in a diversified portfolio of instruments across a variety of different asset classes. The instruments are selected on the basis of proprietary multi-asset trading strategies which may result in the fund investing in the underlying instruments on a long/short basis. The fund will invest in equities, fixed income securities, CIS and ETFs. The fund will also invest in FDI in the form of listed futures and options in order to gain indirect exposure to these instruments and asset classes. The team employs stringent risk analysis and stop loss positions to provide downside protection

Risk Factors & Glossary

The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. The Fund may invest in derivatives to reduce risk or cost and/or generate extra income or growth. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. Part of the fund may invest in bonds. Investment in bonds and other debt instruments will be impacted by factors such as changes in interest rates and risk of default by the issuer. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and the income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio.

The Distribution Yield is the amount received by an investor, and is the sum of distributions paid over the past 12 months and divided by the last price. Since the yield is based on past information it is provided as a guide and should not be taken as a guaranteed yield. If fees are charged to the capital account then this could reduce the amount invested. Income may fluctuate in accordance with market conditions and taxation arrangements.

AMC – Annual Management Charge

A charge covering the costs associated with managing the fund. Although it is expressed in an annual percentage figure, the charge is usually taken in 12 monthly amounts.

OCF - Ongoing Charges Figure

This is a figure representing all annual charges and other operating charges taken from the fund. This includes the AMC.

AUM – Assets Under Management

The total market value of the investments held in this fund.

Annualised performance

The rate of growth the fund makes each year over the specified period.

Discrete Performance

The performance of the fund between two fixed, specific time periods.

Base Currency

The currency in which the net asset value of each portfolio is calculated.

Market Cap allocation

The percentage of the fund's assets that are invested in companies having market capitalisation of a particular size (the total value of a company's shares).

Market Capitalisation Exposure

The percentage of the fund's assets that are invested in companies having market capitalisation of a particular size.

Share Class

Share class is a designation applied to a share in a fund. Different share classes within the same fund will confer different rights on their owners, and potentially restrictions on ownership.

Price / NAV per Share

The price (or NAV per share) is an expression for net asset value that represents a fund's value per share. It is calculated by dividing the total net asset value of the fund or company by the number of shares outstanding.

Risk reward indicator

Used to indicate the level of risk of a fund by providing a number from 1 to 7, with 1 representing low risk and 7 representing high risk.

Volatility

A figure for how much the fund's returns deviate from the average returns over a period.
