Portfolio Strategy

The BMO MSCI EAFE Hedged to CAD Index ETF has been designed to replicate, to the extent possible, the performance of the MSCI EAFE 100% Hedged to CAD Dollars Index, net of expenses. The Fund invests in developed markets equity, excluding Canada and the U.S. The Manager may use a sampling methodology in selecting investments for the fund. The Fund may also invest in or hold securities intended to replicate the performance of the Index. The foreign currency exposure is hedged back to the Canadian dollar. In addition, as ZDM may hold other underlying ETFs, the management fees charged are reduced by the management fees paid on the underlying ETFs.

Benchmark Info

The MSCI EAFE 100% Hedged to CAD Dollars Index is an equity index which captures large and mid-cap representation across Developed Markets countries around the world, excluding the US and Canada. The index covers approximately 85% of the free float-adjusted market capitalization in each country. The foreign currency exposure is hedged back to the Canadian dollar.

Fund Benefits

- Provides convenient and efficient exposure to international equities
- Diversified portfolio consisting of securities listed in developed markets outside of North America
- Currency exposure hedged back to the Canadian dollar
- The underlying securities of ZDM have large daily trade volumes which represents the ETFs true liquidity

The prospectus contains a more detailed description of the limited relationship MSCI has with BMO Asset Management Inc. and any related funds.

¹ Management Expense Ratios (MERs) are the audited MERs as of December 31, 2018.

² Beta is a measure of how a BMO ETF responds to moves in the broader market in which it invests. A beta of greater than 1.00 suggests that the ETF is more volatile than the market, while a beta of less than 1.00 suggests that the ETF is less volatile than the market. Beta may change over time and historical beta is not indicative of future beta. The indicated beta is generally based on historical rolling two-year returns. Where a BMO ETF does not have two years of performance history, the beta may be calculated as long as at least six months of performance history is available.
