### Portfolio Strategy

The BMO China Equity Index ETF has been designed to replicate, to the extent possible, the performance of the S&P/BNY Mellon China Select ADR Index (Index), net of expenses. The ETF will gain exposure to the broad Chinese equity market by holding a basket of American Depository Receipts. The ETF invests in and holds the Constituent Securities of the Index in the same proportion as they are reflected in the Index.

### Benchmark Info

The S&P/BNY Mellon China Select ADR Index (Index) is comprised of a select group of American depository receipts traded on the New York Stock Exchange (NYSE), NYSE Amex or NASDAQ which are domiciled in China. The Index weights are rebalanced quarterly.

### Fund Benefits

- ZCH provides convenient and efficient exposure to Chinese equities through American Depository Receipts
- Diversified portfolio of large capitalization Chinese companies, designed to benefit from growth in the Chinese economy
- Exposed to currency movement, as well as underlying equity returns
- ADRs are held to international accounting standards, instead of local standards
- The underlying securities of ZCH have large daily trade volumes which represents the ETFs true liquidity

<sup>2</sup> Beta is a measure of how a BMO ETF responds to moves in the broader market in which it invests. A beta of greater than 1.00 suggests that the ETF is more volatile than the market, while a beta of less than 1.00 suggests that the ETF is less volatile than the market. Beta may change over time and historical beta is not indicative of future beta. The indicated beta is generally based on historical rolling two-year returns. Where a BMO ETF does not have two years of performance history, the beta may be calculated as long as at least six months of performance history is available.
